Studies in EU External Relations is a peer-reviewed book series dedicated to the legal, political, trade and historical aspects of the EU's relations with non-member states or regions or other international organisations. Focusing on the EU's position and role in the world, the series covers the Union's bilateral as well as its multilateral relations with third countries. This coverage extends to institutional, legal and political issues on or affecting external relations, as well as to specific sectoral substantive topics, including migration, defence or trade matters for example. The series also includes monographs on the external dimension of substantive domestic EU policies (competition, environment, etc). In addition, the series welcomes studies on various facets of the EU enlargement phenomenon and the European Neighbourhood Policy. *Studies in EU External Relations* is an indispensable series for libraries of EU institutes worldwide, European Documentation Centres, academics, officials, practitioners dealing with EU law and policies, national and international institutions and political bodies.

New Title:
The EU and Cyprus
*Principles and Strategies
of Full Integration*

The European integration of Cyprus is the outcome of a process commenced over thirty years ago within the context of the EC external trade relations, culminating with Cyprus' accession to the EU in 2004 and still ongoing within the framework of the EU external relations. The key issue concerns the achievement of 'full' integration arguably through a mode of European integration re-formulating traditional parameters of economic, societal and political integration. Beyond the obvious academic interest arising out of a comprehensive comparative socio-legal study of the process of European integration of a state lying at the EU periphery and, as such, largely ignored in the literature, this book re-directs principles of differentiated European integration towards new means and meanings.

This book offers a comprehensive analysis of the legal and political challenges surrounding the EU accession of the Baltic States. It examines the impact of EU enlargement on relations with Russia and on the constitutional development of the countries concerned.

"The book is a success: balanced, informative and convincing: it is a must for all those interested in the regulation of EU enlargements, EU-Russia relations and, most obviously, in the recent history of the three Baltic states."

Drawing on qualitative and quantitative analysis, this book examines the functioning, effectiveness, coherence and quality of the cooperation, coordination and representation of European Union Member States' national interests and EU policy aims at the United Nations in New York.

"The analysis moves easily through a subject that is in constant evolution both within and outside the normative and institutional domains, making it difficult to assess the coherency and influence of the EU in the UN. One of the book's strong points is the thoroughness with which the thesis is argued, supported by a wealth of accurate data and sources, and the realistic approach provided by interviews with officials from the bodies studied."
